Read by QxMD provides a single place to keep up with new medical and scientific research.

Read simplifies discovery of quality content and access to full text:

1. **Simple access to full text papers** while onsite at your institution or offsite.
2. **Curated content** so your feed remains 100% relevant to what's most important to you.
3. **'Collection' feature** so you can organize impactful articles and easily share them with colleagues and other healthcare professionals.
4. **Annotate, organize and share** citations or full-text articles.

Curate your feed and read only what matters most to you

Each healthcare professional, trainee and scientist reads different articles depending on their area of expertise & interest.

By setting your demographics in your profile and highlighting your favourite journals, articles in your feed will always reflect what's most important to you.

A truly personalized medical journal!

Create collections

Build collections of articles that help you and others in your field stay up-to-date on practice changing research.

Collections can be discovered by anyone on the platform and can also be shared with colleagues in a copyright-compliant manner. You can also keep collections private as needed.

Individual citations can easily be shared via social media and email.
